Striving for the best practices

Course Director: Nathalie Duchesne, MD (CAN)

Faculty:

Deborah Armstrong, MD (USA)	Michael Lagios, MD (USA)	Janice Sung, MD (USA)
Nathalie Duchesne, MD (CAN)	Sarah Pinder, MD (UK)	Robin Wilson, MD (UK)
Terese Kaske, MD (USA)	Arnie Purushotham, MD (UK)	

WHAT:

CME-accredited, *The Breast Course*™ mission is to deliver high-quality accredited education focused on small, image-detected breast cancer. Aimed at specialists working in breast care, *The Breast Course*™ delivers best practices in the areas of diagnostic radiology, pathology, image-guided interventions, surgical techniques, and radiotherapy and brachytherapy treatments.

We have assembled a world-class, multidisciplinary faculty. Our plan is to deliver a highly interactive, innovative and interdisciplinary course on breast cancer detection, intervention, and therapy. Our preliminary program features more case discussions than previous editions with electronic voting, an expanded hands-on workshop format and panel discussions of current controversies.

WHY

- **Increase your knowledge** about small breast cancer and offer state-of-the-art service in your clinic;
- **Reduce your uncertainty** when deciding on the next course of action in detection, intervention or therapy for each patient;
- **Increase your proficiency** and confidence in difficult situations.

The Breast Course helps you improve the quality of care you provide, augment your practice, and give you a competitive edge when needed. Over 1350 past attendees and 35 previous exhibitors can attest to *The Breast Course's* commitment to excellence in reaching these objectives.
