Michael Lagios, MD (USA)

Nancy Wadden, MD (CAN)

Christiane Kuhl, MD (GER)

Melvin Silverstein, MD (USA)

Robin Wilson, MD (UK)

WHAT:

It is with great pleasure that we invite you to our next edition of *The Breast Course™*, to be held at the Pointe Hilton Tapatio Cliffs Resort, Phoenix, Arizona.

CME-accredited, *The Breast Course™* mission is to deliver high-quality accredited education focused on small, image-detected breast cancer. Aimed at specialists working in breast care, *The Breast Course™* delivers best practices in the areas of diagnostic radiology, pathology, image-guided interventions, surgical techniques, and radiotherapy and brachytherapy treatments.

This 6th edition follows in the footsteps of our best-ever meeting this past April in Nice, France, attended by more than 325 participants coming from 51 different countries. Once again, we are working hard to assemble a world-class, multidisciplinary faculty. Our goal is to deliver yet another highly interactive, innovative and interdisciplinary course on breast cancer detection, intervention, and therapy. Our [preliminary program](#) features more debates and case discussions than previous editions, including participant-submitted cases; an expanded hands-on workshop format, electronic voting in key plenaries, and our familiar yet always spectacular live cases.

WHY

- **Increase your knowledge** about small breast cancer and offer state-of-the-art service in your clinic;
- **Reduce your uncertainty** when deciding on the next course of action in detection, intervention or therapy for each patient;
- **Increase your proficiency** and confidence in difficult situations.

The Breast Course helps you improve the quality of care you provide, augment your practice, and give you a competitive edge when needed. Over 900 past attendees and 36 previous exhibitors can attest to *The Breast Course's* commitment to excellence in reaching these objectives.
